- Growing business needs more than just an accounting software. Modern businesses need real-time data and analytics to stay ahead of competition.
- TEZ ERP allows you and your staff to access and update data using any device connected to internet, including your Mobile phone, tablet, PC or laptop. This helps you capture data in real-time. MIS alerts keep you updated about your business and BI (Business Intelligence) dashboard with built-in Analytics help you take informed decisions.
- TEZ ERP is a software made in India, keeping Indian accounting practices in mind.

Summary

TEZ ERP is the ideal solution for traders and manufacturers for managing their accounts, inventory, taxation, documents, inquiries and after sale service.
